

Our Capability Statement

Company Profile & History

BTC Plumbing enjoys a reputation as an experienced, reliable and professional plumbing company offering plumbing solutions to residential, commercial and industrial projects throughout Central Queensland.

Founded by Brad Coonan and originally based as a mining pipeline contracting company - focusing on strong customer service and allowing the company to grow into the respected business it is today. BTC Plumbing was established with future growth and expansion in mind and continues to succeed and build a strong foundation as a leading plumbing company.

Now based in Bundaberg, BTC Plumbing has grown and expanded over the past 5 years to be a leading plumbing contractor in this area. While we operate with a small workforce, we have trained and experienced tradesmen to cement our solid reputation of providing innovative plumbing solutions for residential, commercial and industrial buildings.

Having an experienced team of professional tradesmen, allows BTC Plumbing to contract to Real Estate Maintenance, builders and large commercial businesses providing plumbing solutions from maintenance work to large scale food processing facilities as well as contracting to major construction companies.

These onsite professionals are backed up with an experienced Director and administrative officer, allowing projects of all sizes to flow seamlessly from start to finish.

BTC Plumbing is equally at home in the residential market, working with some of the region's most respected building companies and providing maintenance to local industries. BTC Plumbing continues to grow since being based in Bundaberg in 2012 with continued employee growth each year and fleet growth in machinery, equipment and vehicles.

Plant and Equipment

AT BTC Plumbing we pride ourselves on having the right equipment and reliable equipment for our staff to use. Regularly maintained tooling and equipment ensures we have minimal downtime and don't have breakdowns onsite.

We have 3 fully equipped maintenance vehicles servicing the Bundaberg region from minor repairs such as leaking taps to excavating and replacing drainage. They can do it all.

Our high pressure water jetter and CCTV combination almost never stops. The visual aspect of having CCTV camera access has improved our efficiency for clearing all types of drain blockages.

Also making life more productive is our new 2.5T Kubota Excavator and 3T Tipper, for all those jobs where the shovel doesn't cut it we can halve the labour to get the job completed.

Scope of Services

BTC Plumbing provides a wide range of plumbing solutions to residential, commercial and industrial clients throughout the Bundaberg Region and prides itself on professional, efficient and competitive service.

The company is compliant in all health, safety and environmental policies, providing a safe work environment for employees and subcontractors on every job.

RESIDENTIAL

BTC Plumbing can take care of anything from new housing requirements to renovations and preventative maintenance, all carried out by our professional and experienced personnel

COMMERCIAL

BTC Plumbing specialises in complete plumbing services for all commercial ventures. The company's commercial plumbing experience is extensive and varied using quality equipment and materials.

INDUSTRIAL

The needs of specialised industry companies are wide and varied. Whether your business specialises in agriculture, horticulture, manufacturing & assembly or mining, BTC Plumbing is able to assist.

SPECIALISED SERVICES

BTC Plumbing is also licenced and experienced to offer specialised plumbing services such as Domestic Waste Water Installation and Servicing, Excavator Operation, Backflow Testing and High Pressure Water Jetting and CCTV Camera to name a few.
